

Only Rain Down the Storm Drain:

Water goes down the storm drain and directly to our river!

Problem:

Solution:

Litter

Pick up after yourself and hold onto trash in the wind.

Oil

Fix oil leaks in your car, take used oil to be properly disposed, soak up leaks with kitty litter & sweep up.

Pet Waste

Pick up after your pets do their business, throw away in the trash.

Pesticides/ Herbicides/ Fertilizer

Try natural solutions. Do not use right before it rains. Test your soil before using fertilizers.

Lawn litter

Leave grass clippings on lawn to self-fertilize. Blow or sweep leaf/lawn litter out of street.

Salt from De-icers

Use salt-free, animal safe, biodegradable ice melt. Or use the bare minimum of sidewalk salt.

Toxins (Paint, harsh cleaners, etc.)

Do not pour in street gutters or down the storm drain. Take household hazardous waste to be properly disposed.

Car Soap

Use biodegradable soap when washing your car in the driveway or street.
